

# ENRICHMENT SUPPLEMENTAL ACTIVITIES

## Visual Tracking Paragraphs

### Directions

#### ABC tracking

Time this activity. Have your child put a large felt square beside the paper on the same

side that he writes. This felt piece will be the “home base” to rest his hand so he doesn’t use the pencil or his fingers to track. We want him to rely only on his eyes to track. He will start at the top of one of the paragraphs and circle each letter starting with “a”, then “b” then “c” and moving all the way to “z.” If you notice him moving his head, place something like a bean bag or quarter on his head to encourage him to keep his head still. Remember, we want him to only track with his eyes. After he circles each individual letter he should return his hand to the “home base.” When he finds the next letter he can remove his hand from the home base to circle the letter, and then return. See how fast he can go!

#### Line tracking

A quick exercise to increase accuracy in tracking from line to line is to have the students start at the top of any paragraph and state the first and last letter of each line as quickly as possible.
